

Aniraj Kesavan

AI-Native Tech Leader · Distributed Systems · Harness Engineering · Observability

10+ years building high-throughput infrastructure at Salesforce and LinkedIn. Expert in distributed systems, observability platforms, and time-series databases operating at tens of millions of QPS. Increasingly focused on AI-native engineering — harness systems, model telemetry pipelines, and agentic tooling for production workloads.

SKILLS

Distributed Systems · Time-Series Databases ·
Observability
Golang · Python · Java · C++

AI/ML Infrastructure · Harness Engineering · Model
Monitoring
AWS · Docker · Kubernetes

EXPERIENCE

Salesforce

2022–Present

Lead Member of Technical Staff

San Francisco, CA & Bengaluru, India

- Built and scaled Argus, the planet-scale metrics and alerting platform powering observability across Salesforce.
- Re-architected metric ingestion pipeline, improving availability from 99.9% to 99.99%.
- Led storage tier migration from single-region to geo-distributed multi-region active-active architecture.
- Driving harness engineering and AI/ML workload observability for production AI systems.

LinkedIn

2017–2022

Senior Software Engineer

Sunnyvale, CA

- Led metadata storage for the monitoring platform — tens of billions of time-series identifiers at tens of millions of QPS.
- Refactored metadata layer with Vitess and Roaring Bitmaps, significantly cutting storage overhead and query latency.
- Contributed to LinkedIn's in-house distributed time-series database serving A/B testing and ML feature pipelines.
- Built distributed health-check aggregation platform covering hundreds of thousands of servers.

University of Utah

2015–2017

Graduate Research Assistant

Salt Lake City, UT

- Published researcher on high-performance data transfers for in-memory databases.
- Explored scatter-gather DMA on modern NICs for RAMCloud; work published at SOSP '17, VLDB '16, and IEEE Data Engineering Bulletin.

DreamWorks Animation

2014–2015

R&D Engineer, Production Pipeline

Bengaluru, India

- Built graph-based production pipeline tooling for animated feature films.
- Credited R&D Engineer on three Hollywood productions.

Zynga

2012–2013

Associate Software Engineer

Bengaluru, India

- Developed zBase, Zynga's internal high-performance distributed key-value store.

EDUCATION

Computer Science, Master of Science

2017

University of Utah · Salt Lake City, UT
